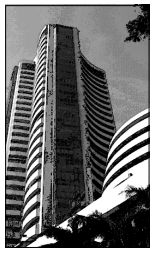
Markets continue free-fall as RBI keeps rate unchanged; post 5th weekly loss

MUMBAI, OCT 5 /--/ Equity markets racked up heavy losses for the third straight session Friday after the RBI unexpectedly maintained status quo on rates but changed its stance to "calibrated tightening" amid the rupee breaching the 74-mark.

The BSE Sensex plunged 792.17 points to end at a near six-month low of 34,376.99, while the broader NSE Nifty dropped 282.80 points to 10,316.45.

This was the fifth straight weekly loss for the benchmarks. The Sensex declined by a massive 1,850.15 points or 5.10 per cent, and the Nifty lost 614 points or 5.50 per cent, this week.

The Reserve Bank Friday unexpectedly maintained status quo on the benchmark interest rate



but warned that rising oil prices and tightening of global financial conditions pose substantial risks to growth and inflation.

The central bank changed its policy stance to 'calibrated tightening' from 'neutral', while affirming its commitment to achieve the medium-term objectives to contain price rise.

Marketmen were expecting the six-member Monetary Policy Committee to go for at least a 0.25 per cent hike at the review.

Meanwhile, the rupee crashed below the 74-level against the US dollar for the first time ever. The domestic currency was quoting 65 paise lower at 74.23 (intra-day) against the dollar soon after the RBI announced its monetary policy.

The 30-share index remained in the negative zone through the session. Selling activity gathered momentum after the RBI's policy decision, which dragged the index to a low of 34,202.22. It finally finished 792.17 points, or 2.25 per cent down at 34,376.99.

Rupee slumps to all-time low of 73.76 as RBI holds rate

MUMBAI, OCT 5 /--/ The rupee skidded by 18 paise to finish at a fresh lifetime low of 73.76 against the US dollar Friday after the RBI unexpectedly kept the policy rate unchanged.

The domestic unit crashed below the 74-mark for the first time ever in intra-day trade on persistent capital outflows and high crude oil prices.

Markets were caught off guard as the Reserve Bank maintained status quo on the benchmark interest rate. However, the central bank warned that rising oil prices and tightening of global financial conditions pose substantial risks to growth and inflation. It also changed its policy stance to 'calibrated tightening' from 'neutral'.

Meanwhile, RBI Governor Urjit Patel Friday reiterated that the domestic currency is still better than its emerging market peers and that the apex bank does not have a target for it.

"The rupee fall, in some respect, is moderate in comparison to several other emerging market peers," Patel said at the customary post-policy press meet.

"Our response to these unsettled conditions has been to ensure that foreign exchange market remains liquid with no undue volatility. There is no target or band around any particular level of exchange rate, which is determined by market forces demand and supply," the governor added.

A majority of the analysts and bankers were expecting the six-member Monetary Policy Committee (MPC) to raise interest rate by at least 0.25 per cent, while the developments over the last few days, especially the weakness in the rupee, had led to speculations that it could be even as high as 0.50 per cent. Equity markets racked up heavy losses for the third straight session. The BSE Sensex plunged 792.17 points to end at a near six-month low of 34,376.99, while the broader NSE Nifty dropped 282.80 points to 10,316.45.

At the Interbank Foreign Exchange (Forex) market, the local currency opened higher at 73.56 a dollar against its previous record closing low of 73.58.

It recovered to a high of 73.42, but failed to sustain the momentum and plunged to 74.23 after RBI's policy announcement.

It finally closed at 73.76, down by 18 paise or 0.24 per cent, marking its fourth straight session of decline. On Thursday, the domestic unit plummeted by 24 paise to end at 73.58.

"The rupee has extended losses as the RBI monetary policy meeting has clearly disappointed the street. Market was expecting at least 25 bps repo rate hike and measures to stabilise the rupee.

"Given the sell-off in the domestic equities and higher crude oil prices, the rupee is now expected to move towards 75-76 levels in next couple of sessions," said Rushabh Maru - Research Analyst , Anand Rathi Shares and Stock Brokers. Brent crude oil prices were trading at USD 84.36 per barrel, showing a dip of 0.26 per cent. (PTI)

Anil's latest foray: Reliance Health Insurance gets final Irdai nod

NEW DELHI, OCT 5 /--/ Anil Ambani-led Reliance Health Insurance, a wholly owned subsidiary of Reliance Capital, has received final approval from the insurance regulator to start operations. The company plans to commence operations by the December quarter of 2018.

In a regulatory filing on Friday, Reliance Capital said Reliance Health Insurance "has received R3 approval from the Insurance Regulatory and Development Authority of India (Irdai) for its new health insurance business".

"The scope of health insurance in India is massive and, given the current low penetration, is expected to grow multi-fold over the next few years," Reliance Capital Anmol Ambani Executive Director said.

Infra cos need to work on innovative instrument to attract global funds: Prabhu

NEW DELHI, OCT 5 /--/ Stating that there is no dearth of funds, Commerce and Industry Minister Suresh Prabhu Friday said there is a need to work on innovative instrument and structure to attract global money for investment in infrastructure sector.

The government is in talks with various global funds to sell India growth story, he said. "I have talked to funds in Australia and Canada and government is trying to work with them. Uniqueness of this is that the pension funds of both Canada and Australia is more than the their national GDP," Prabhu said at an event organised by rating agency Crisil here. The government is talking to them, he added. "On 15th of this month, I have invited the chairman of Abu Dhabi Investment Authority, which is the largest sovereign wealth fund in the world.

"They are very keen for investment in India. They feel that India is a growth story...India's GDP is bound to rise...they want to invest in India. Now, with all these things in place what is missing is instrument, structures and policies," the minister said. So, infrastructure developers need to work out instruments and proper structure to attract investment, Prabhu noted.

Speaking on the occasion, Niti Aayog CEO Amitabh Kant said there is need of long term lending for the development of infra projects which cannot come from commercial banks. He also emphasised on the need for development of bond market.

"There is major challenge of long term financing in India. We don't have development finance institutions. All the development finance institutions have been converted into banks. There is need for development finance institution," Kant said.

There is a need for more institutions like India Infrastructure Finance Company Ltd (IIFCL) to take care of long term financing need of infrastructure projects, he added. Meanwhile, Crisil in its report highlighted that a material ramp-up in government spending in the past few years has meant the share of private investments in infrastructure has fallen to a decadal low of around 25 per cent in fiscal 2018. "The share, which averaged 37 per cent between fiscals 2008 and 2013, fell 600 basis points between fiscals 2013 and 2017 as a plethora of stalled projects and stressed assets dampened investor interest and risk appetite," it said. While the highways sector has seen a revival in public private partnerships (PPPs), and the renewables sector some buoyancy, private investments in other infrastructure segments have remained stagnant or weak, it said.

Gold prices fall on weak global cues, low demand

NEW DELHI, OCT 5 /--/ Gold prices fell by Rs 250 to Rs 31,850 per 10 gram at the bullion market Friday, tracking a sluggish trend overseas amid fall in demand from local jewellers.

Silver prices, too, fell by Rs 100 to Rs 39,250 per kg due to reduced offtake by industrial units and coin makers.

According to traders, gold prices took a hit due to fall in demand at prevailing levels from local jewellers at the domestic spot market and a weak trend overseas.

Globally, gold softened by 0.16 per cent to USD 1,199.40 an ounce in Singapore Friday as investors remained cautious after the US Treasury yields hit multi-year peaks and ahead of monthly employment data.
