

Policy stability key to nurture industry: Maruti Suzuki

NEW DELHI, AUGUST 11 /- The country's largest carmaker Maruti Suzuki India has said policy stability and predictability are important to nurture industry ecosystem as business environment is becoming more and more uncertain. While the "fast changing regulations have also created a dynamic business environment", Maruti Suzuki India MD and CEO Kenichi Ayukawa said, "the auto industry is a policy sensitive one, and a change in regulation can have far reaching impact on our growth or direction of technology and manufacturing". In his address to shareholders in the company's annual report 2016-17, Ayukawa said: "One of the important lessons we learnt last year was that the business environment is becoming more and more uncertain, and that the organisation has to be strengthened further to deal effectively with such unanticipated disruptions". Describing 2016-17 as a "dynamic and eventful year", he said: "We had our share of challenges in the form of short term disruptions in operations caused by fires at two of our key suppliers. Also, there was some initial uncertainty after the demonetisation event. Despite these challenges, however, our market share touched up and we managed to welcome more and more customers to our family". Calling for consistent policies, Ayukawa said: "Policy stability and predictability are important to nurture the industry ecosystem. It helps industry gain efficiencies and get clarity on which targets and technologies to work on". He further said, "We are working with the government in thinking of policies that can make our cars safer, cleaner and more beneficial to the consumer in the Indian context". In 2016-17, the auto industry had to face uncertainties such as the Supreme Court ban on registration of high end diesel cars and SUVs having engine capacity of 2,000cc and above in Delhi and NCR, and sales of BS III vehicles. Big cars and SUVs are now facing possible hike in cost under the new tax regime with the GST Council recommending increasing the maximum ceiling to 25 per cent from 15 per cent over and above the tax rate of 28 per cent. MSI Chairman RC Bhargava, while welcoming the government's decision to promote electric vehicles (EVs), said the company "would not hold back in introducing EVs as soon as we determine that the customers are ready to buy them".

Note even a rupee of corporate loans written off: FIM

NEW DELHI, AUGUST 11 /- Union Finance Minister Arun Jaitley on Friday asserted that not even a single rupee of loans taken by the corporates has been written off by the government and asked the Opposition to first get the facts before talking about it. He told the Lok Sabha that writing off a loan was a commercial decision of the government and added that there has been no scheme of farm loan waiver by the Centre since 2014. Not even one rupee of the corporates has been written off by the government, he said during the Question Hour. Those making such comments should first get the facts and then talk, he said while responding to a supplementary question by Congress member Deepender Singh Hooda alleging that the government has written off corporate loans, but not that of farmers. At the end of March this year, the total outstanding gross non-performing assets (NPAs) of agriculture and allied activities stood at Rs 62,307 crore, as per data given by the minister in his written reply. The amount was Rs 51,964 crore at the end of March 31, 2016. Jaitley said that information relating to the quantum of farm loans written off was not maintained centrally. However, RBI has reported that the reduction in non-performing asset (NPA) due to write off (including compromise) for agriculture and allied activities during FY2016-17 is reported to be of the tune of Rs 7,548 crore, he said. The minister also said that the government would make investments worth Rs 2.92 lakh in financial year in the farm and rural sectors, which would be a record amount. To a query on whether the central government would waive off farm loans, Minister of State for Finance Santosh Kumar Gangwar said there is no such decision.

'Govt acting fast against shell cos'

NEW DELHI: Speedy steps are being taken against shell companies but a balance needs to be struck between the ease of doing business and ensuring that the firms are not misused, Jaitley said.

Jaitley, who is also the Corporate Affairs Minister besides holding the Finance and Defence portfolios, told the House that there is no definition for shell companies under the Companies Act but such entities are used for round tripping of money. The real owners behind such entities need to be identified and expeditious steps are being taken under the benami and Income Tax laws, the minister said during the Question Hour. Replying to supplementaries, Jaitley mentioned about markets regulator Sebi's action against suspected shell companies on the stock exchanges, saying "baazaar mein thoda utpathal hua (there was some turmoil in the markets)".

On August 7, Sebi had asked the stock exchanges to take action against 351 suspected shell companies which were referred to it by the corporate affairs ministry. While noting that a company can be registered in two days, Jaitley said a balance should be there in terms of ease of doing business and ensuring that the companies being set up are not misused. With technology, it is not difficult, he added. Responding to a supplementary question by Congress member Shashi Tharoor, the minister said there is a distinction between dormant and shell companies. There is potential for dormant companies being misused as shell companies but there is an additional instrument deal with such entities, Jaitley added. (PTI)

Survey warns of uncertain fiscal outlook, challenges

NEW DELHI, AUGUST 11 /- Flagging uncertain fiscal outlook for the current fiscal, the second part of Economic Survey released on Friday said achieving higher end of 6.75-7.5 per cent GDP growth estimated earlier will be difficult and called for more interest rate cuts to boost the economy. Its list of challenges included appreciation of the rupee, farm loan waivers, rising stress on balance sheets in power as well as telecom and transition issues arising from implementing the Goods and Services Tax (GST). The Survey warned of fiscal slippages as "a series of deflationary impulses are weighing on an economy yet to gather its full momentum".

Authorised by Chief Economic Adviser Arvind Subramanian and tabled in Parliament, the Survey said farm loan waiver could cut economy demand by up to 0.7 per cent of GDP. It saw farm loan waivers by states touching Rs 7 lakh crore. It said inflation is expected to remain below the Reserve Bank of India's medium-term target of 4 per cent, through the fiscal deficit will be 3.2 per cent of GDP in 2017-18 as compared to 3.5 per cent last fiscal. The mid-year survey of the economy said there was "considerable" scope for further easing in monetary policy as the repo rate was 25.75 basis above the neutral rate. RBI had last week cut its main policy rate by 25 basis points to 6 per cent, the lowest since November 2014.

"Cyclical conditions suggest that the policy rate should actually be below... the neutral rate. The conclusion is inescapable that the scope for monetary easing is considerable", it said.

Citing deflationary impulses, the Survey stressed that farm revenues, decline in non-cereal food prices, farm loan waivers, fiscal tightening and declining profitability in the power and telecom sector are weighing on the economy. "Economy is yet to gather its full momentum and still away from its potential," it said. It further said a number of indicators - GDP, IIP, credit offtake, investment and capacity utilisation - point to a deceleration in real activity since first quarter of 2016-17, and a further deceleration since the third quarter. The Part-I of the Survey tabled in Parliament on January 31 had "predicted

Survey warns of uncertain fiscal outlook, challenges

a range for GDP growth of between 6.75 and 7.5 per cent, factoring in more buoyant exports as global recovery gathered steam, a post-demonetisation catch-up in consumption, and a relaxation in monetary conditions". "The balance of risks seem to have shifted to the downside. The balance of probabilities has changed accordingly, with outcomes closer to the upper end having much less weight than previously," it said.

Need tools to revive growth in short term: CEA

NEW DELHI: The economy has seen across-the-board deceleration in activity and requires policy makers to come up with all the possible tools to revive growth, Subramanian said on Friday.

The likely growth this fiscal will be towards the lower end of the 6.75-7.5 per cent band suggested in January, and, mainly because of downside effects of factors like the appreciation of the rupee, farm loan waivers and transitional challenges from implementing GST, he said.

The only upside possibility is exports growth. "Farm loan waiver will be deflationary exerting a drag on growth in short run... We are not changing the growth forecast, but we are saying that because of all these risks it is less likely that we will see outcomes to the right of the upper end of the forecast," said Subramanian. Addressing reporters after the Economic Survey-2 was tabled in Parliament, he said there was an "across-the-board deceleration" in real economic activity since the first and second quarters of last year.

"There are very favourable medium term developments. The real challenge now is short term growth and how to we need to respond to that. We need to bring to bare all the policy tools we have to revive short term growth," said Subramanian, the author of the Survey. For the last 10 months, he said, inflation figures have come out better by about 150 basis points than the target that was set.

"End March inflation is going to be well within target and average inflation for year as a whole is going to be well below target. Average inflation for year will be closer to 3 per cent," Subramanian added. (PTI)

SAT dismisses Mallya's plea against Sebi order

NEW DELHI, AUGUST 11 /- The Securities Appellate Tribunal (SAT) on Friday rejected fugitive liquor Baron Vijay Mallya's appeal against Sebi barring him from the market and asked him to appear before the regulator within three weeks. The tribunal also dismissed his plea against the order to appear before the regulator within three weeks. The tribunal also dismissed his plea against the order to appear before the regulator within three weeks, including as the chairman of his group firm United Breweries Ltd (UBL).

Mallya has been asked by SAT to appear before Sebi to answer before the regulator within 21 days, so that the order to appear before the regulator within three weeks imposed through an interim order passed in January relating to alleged illegal diversions at his erstwhile flagship United Spirits Ltd. "Thereafter, Sebi shall consider the same and proceed to take up the matter and pass final orders expeditiously and preferably within a period of four weeks from the date of compliance with law to give finality to the issue," the tribunal said in its 25-page order.

Industrial output contracts 0.1% in June

NEW DELHI, AUGUST 11 /- Industrial output entered the negative territory in June contracting by 0.1 per cent mainly due to decline in manufacturing and capital goods sector. Besides, segments like mining, power generation, infrastructure/construction goods and consumer durables recorded poor performance. Factory output, measured in terms of Index of Industrial Production, grew 8 per cent in June 2016, according to the data released by the Central Statistics Office on Friday. On a quarterly basis, factory output growth during April-June slowed down to 6.8 per cent from a growth of 7.1 per cent in the corresponding period last year. This is the first time in the current fiscal, the industrial output has shown a decline. The IIP grew by 3.4 per cent in April and 2.8 per cent in May as per the revised estimates released today. Manufacturing sector, which constitutes over 77 per cent of the index, showed a decline of 0.4 per cent in June as compared to a growth of 7.5 per cent in the same month last year. The output of mining and electricity sectors during the month of June 2017 as compared to 0.4 per cent and 2.1 per cent from 10.2 per cent and 9.8 per cent respectively in June last year. Capital goods output, which is the barometer of investment, declined by 6.8 per cent from a growth of 14.8 per cent a year ago. Similarly, the output of primary goods and intermediate goods during the month declined by 0.2 per cent and 0.6 per cent as against growth of 0.2 per cent and 6 per cent respectively during the same month last year. The Consumer durables and Consumer non-durables have recorded growth of () 2.1 per cent and 4.9 per cent in June as compared to 1.5 per cent and 1.5 per cent in the corresponding month of the previous year.
