

Power Fin Corp lists green bond on LSE

LONDON, NOV 30 /- London Stock Exchange is a recognised world leader in green, sustainable and debt financing, highlighted by this year's exceptional green fixed income activity. London supports issuers from Abu Dhabi to China, Finland to India in accessing international investment capital," he said.

He added that there has been an "undeniable shift" in momentum in green and sustainable financing across the world which has triggered a "green funding revolution".

According to the LSE,

green bonds in London have raised over USD 3.2 billion in November 2017 alone. In total, there are 59 green bonds listed in London that have raised over USD 19.5 billion in aggregate terms across seven currencies.

The London Stock Exchange Group (LSEG) said it has been supporting investors and issuers in the transition to a low-carbon and sustainable economy for over a decade, developing innovative products and services in close collaboration with the market.

"The funds raised will help promote renewable energy projects across the country and aid in achieving the government's target of 175GW of installed renewable energy capacity by 2022," said PPC chairman Rajeev Sharma.

"The bond issuance allows PPC to access a new offshore investor base and also diversify its funding sources," he said.

The PPC said that projects eligible for the funds will be identified within its Green Bond Framework, which was drafted in accordance with the Green Bond Principles, a global set of guidelines framing the issuance of green bonds.

The latest Climate Bonds Initiative certified bond is the seventh green bond listed on London Stock Exchange in November 2017, and the fifth green bond by an Indian issuer in London.

"PPC is unlocking and promoting green finance across India, enabling the country to achieve its ambitious climate change targets set out under the COP21 agreement," said Nikhil Rathi, CEO of London Stock Exchange Plc.
