

Sensex crashes over 750 pts; Nifty ends below 10,300 on global rout

MUMBAI, OCT 11 /- The BSE Sensex slumped over 750 points to end at a six-month low and NSE Nifty ended below the 10,300 mark Thursday as global indices witnessed across-the-board losses after investor sentiment was hit by heavy sell-off in world markets.

The 30-share index, which commenced with a gap down opening, cracked over 1,000 points, breaching the 34,000-mark and hit a low of 33,723.53, before staging a partial recovery to touch a high of 34,325.09 in afternoon trade.

The gauge finally ended 758.74 points, or 2.19 per cent, lower at 34,011.15. This is the lowest closing since April 11. It had gained 461.42 points Wednesday.

Similarly, the NSE Nifty settled at 10,234.65, down 225.45 points, or 2.16 per cent. It moved between 10,138.60 and 10,335.95 in day trade.

"This sell-off is part of the global sell-off triggered by the sharp cut in the mother market US," said VK

Vijayakumar, Chief Investment Strategist at Geojit Financial Services.

This is leading to capital outflows from emerging markets (EMs) like India. Apart from the rising bond yield in the US and EM currency woe, there are global trade skirmishes impacting the sentiment, he added. "While most of the earlier fall could be attributed largely to domestic factors, the reason for Thursday's fall is clearly global with the US markets falling sharply after President Trump's acerbic comments against the Federal Reserve and the

consequent sharp fall witnessed in all the major Asian markets," said Dheeraj Singh, Head of Investments-Taurus AMC.

In an unprecedented development, US President, Trump said the Federal Reserve had gone crazy after the Dow Jones Industrial Average in New York tumbled by over 900 points Wednesday, the biggest decline in more than seven months.

Among the Sensex pack, state-run lender SBI was the biggest loser, plunging by 5.74 per cent, followed by Tata Steel 4.60 per cent. Stocks of IT bellwethers like Infosys, 3.19 per cent ahead of September current earnings to be released later Thursday. Other laggards included global with the US markets falling sharply after President Trump's acerbic comments against the Federal Reserve and the

Rupee recovers after slumping to record low, up 9 paise to 74.12

MUMBAI, OCT 11 /- The rupee climbed 9 paise to end at 74.12 per dollar Thursday after tumbling to a fresh lifetime low in intra-day trade amid a sharp sell-off in global markets. Softening crude oil prices and the greenback weakening against other currencies provided support to the home unit, brokers said. Asian and European equities sank deep into the red after US markets reeled due to concerns surrounding global growth and rising bond yields. At the Interbank Foreign Exchange (Forex), the rupee opened lower at 74.37 and lost further ground to hit a record intra-day low of 74.50 against the US dollar on strong

demand for the American currency from importers amid unabated foreign fund outflows.

The rupee clawed back lost ground and finally settled for the day at 74.12, up by 9 paise, during a gain for the second consecutive day in an otherwise volatile market. On Wednesday, the rupee rose by 18 paise to 74.21. "Rupee gained due to falling oil prices and slide in domestic bond yield. Oil prices declined in expectation of increased production and if this trend continues, the rupee may find some stability," Geojit Financial Services Head of Research Vinod Nair said.

IMF chief defends rate hikes after Trump slams 'crazy' Fed

STREET sell-off on Wednesday, Trump said the Fed was making a mistake. "I think the Fed has gone crazy," he said.

Trump has repeatedly touted Wall Street records as proof of the success of his economic programme including his confrontational trade strategy and has frequently criticised the Fed for gradually raising interest rates, which could press the brakes on equity markets.

The global financial elite are on the Indonesian holiday island for a week of discussions clouded by the economic outlook.

The IMF's latest report on world financial stability, released Wednesday, said global growth could be at risk if emerging markets deteriorate further or trade tensions escalate.

Much of the global angst has been dominated by Trump's escalating tariff war with China and his disdain for world trading norms. But higher US interest rates have also

helped send emerging market currencies into a tailspin, as countries that borrowed heavily in dollars race to pay back debt.

On Wednesday, Lagarde said world leaders should fix trading systems instead of tearing them down, in response to nationalist politicians pushing tariffs and protectionism.

Street sell-off on Wednesday, Trump said the Fed was making a mistake. "I think the Fed has gone crazy," he said.

Trump has repeatedly touted Wall Street records as proof of the success of his economic programme including his confrontational trade strategy and has frequently criticised the Fed for gradually raising interest rates, which could press the brakes on equity markets.
