

## Sensex crashes over 750 pts; Nifty ends below 10,300 on global rout

**MUMBAI, OCT 11** /- The BSE Sensex slumped over 750 points to end at a six-month low and NSE Nifty ended below the 10,300 mark Thursday as global indices witnessed a sell-off after investor sentiment was hit by heavy sell-off in world markets.

The 30-share index, which commenced with a gap down opening, crunched over 1,000 points, breaching the 34,000 mark and hit a low of 33,723.53, before staging a partial recovery to touch a high of 34,325.09 in afternoon trade.

The gain finally ended 759.74 points, or 2.19 per cent, lower at 34,565. This is the lowest closing since April 11. It had gained 461.42 points Wednesday.

Similarly, the NSE Nifty settled at 10,234.65, down 225.45 points, or 2.19 per cent. It moved between 10,138.60 and 10,335.95 in day trade.

"This sell-off is part of the global sell-off triggered by the sharp cut in the mother market US," said VK

Vijayakumar, Chief Investment Strategist at Geojit Financial Services.

This is leading to capital outflows from emerging markets (EMs) like India. Apart from the rising bond yield in the US and EM currency woes, there are global trade skirmishes impacting the sentiment, he added. "While most of the earlier fall could be attributed largely to domestic factors, the reason for Thursday's fall is clearly global with the US markets falling sharply after President Trump's tweets comments against the Federal Reserve and the

## Rupee recovers after slumping to record low, up 9 paise to 74.12

**MUMBAI, OCT 11** /- The Rupee climbed 9 paise to end at 74.12 per dollar Thursday after tumbling to a fresh life low in intra-day trade amid a sharp sell-off in global markets. Softening crude oil prices and the greenback weakening against other currencies provided support to the home unit, brokers said. Asian and European equities sank deep into the red after US markets reeled due to concerns surrounding global growth and rising bond yields. At the Interbank Foreign Exchange (Forex), the rupee opened lower at 74.37 and lost further ground to hit a record intra-day low of 74.50 against the US dollar on strong

demands for the American currency from importers amid unabated foreign fund outflows. However, the rupee clawed back lost ground and finally settled for the day at 74.12, up by 9 paise, posting a gain for the second consecutive day in an otherwise volatile market. On Wednesday, the rupee rose by 18 paise to 74.21. Rupee gained due to falling oil prices and slide in domestic bond yield. Oil prices declined in expectation of increased production and if this trend continues, the rupee may find some stability," Geojit Financial Services Head of Research Vinod Nair said.

## IMF chief defends rate hikes after Trump slams 'crazy' Fed

**NUSA DUA (INDONESIA), OCT 11** /- IMF chief Christine Lagarde on Thursday defended central bank rate hikes in a veiled rebuke to Donald Trump after the US president blamed "crazy" Fed policies for contributing to financial market turmoil. Lagarde's comments came as a global market sell-off riggered on following Trump's comments, underscoring rising financial volatility that the IMF will address at its annual meetings this week in Bali.

Lagarde said central bank rate increases such as those by the policy-setting US Federal Reserve were justified by fundamental factors. "It's clearly a necessary development for those economies that are showing much improved growth, inflation that is picking up, unemployment that is extremely low," she told a press briefing in Bali.

"It's inevitable that the central banks make the decisions that they make. Following a sharp fall

Street sell-off on Wednesday, Trump said the Federal Reserve "is making a mistake." "I think the Fed has gone crazy," he said.

On Wednesday, Lagarde touted Wall Street records as proof of the success of his economic programme including his confrontational trade strategy and has frequently criticised the Fed for gradually raising interest rates, which could press the brakes on equity markets.

The IMF's latest report on the global economic elite are on the Indonesian island for a week of discussions clouded by the economic outlook.

"The IMF's latest report on the global economic elite are on the Indonesian island for a week of discussions clouded by the economic outlook. The IMF's latest report on the global economic elite are on the Indonesian island for a week of discussions clouded by the economic outlook.

Much of the global angst has been dominated by Trump's escalating tariff war with China and his disdain for world trading norms. But higher US interest rates have also

helped send emerging market currencies into a tailspin, as countries that borrowed heavily in dollars race to pay back debt.

Lagarde said world leaders should fix global trading systems instead of tearing them down, in response to nationalist politicians pushing tariffs and protectionism.
