PM targets Rs 12k-cr saving in oil import bill from ethanol use

NEW DELHI, AUGUST 10 /- Prime Minister Narendra Modi Friday set a target to triple ethanol production in four years to help save Rs 12,000 crore in oil import bill by mixing the sugarcane extract in petrol as well as boost farm income.

Speaking at a function here to mark World Biofuel Day, he said about Rs 10,000 crore is being invested in setting up 12 bio-refineries in the country that will produce fuel from crop stubble and residue as well as urban waste.

"Biofuels can help reduce import dependency on crude oil. They can contribute to a cleaner environment, generate additional income for farmers and create rural

jobs," he said. Modi said fuel generated from sugarcane and crop residue not only gives additional income to farmers but also helps the environment by the safe disposal of farm stubble. The world's third largest oil consumer is dependent on imports to meet 81 per cent of its needs and substituting some of the fuel with biofuels will help cut crude oil import dependence.

India started blending ethanol, produced as a by-product during the process of making sugar from sugarcane, in petrol during the first NDA regime in 2002. But the programme slowed almost to a grinding halt in the 10-year rule of Congress-led UPA. Modi said the programme to mix ethanol in petrol was

revived when the BJP-led NDA came to power again in 2014.

"As a result of the efforts of the Centre, ethanol blending in petrol to 5 per cent increased from 38 crore litres in the ethanol supply year 2013-14, to an estimated 141 crore litres in the ethanol supply year 2017-18," he said, adding this saved close to Rs 4,000 crore in oil import bill. The target, he said, is to raise ethanol production for doping in petrol to 450 crore litres in four years that will save Rs 12,000 crore in import bill. India spent nearly USD 88 billion (about Rs 5.8 lakh crore) on import of crude oil in 2017-18.

"Our target is to raise blending of ethanol in petrol to 10 per cent by 2022

and to 20 per cent by 2030," he said. Currently petrol contains 3.8 per cent of ethanol.

The bio-refineries being set up will generate about 1.5 lakh jobs in the entire value chain, he said. Also, the government approved the National Policy on Biofuels in June this year which seeks to produce fuel that can be doped in petrol and diesel from agriculture and municipal waste as well as crop residue, he said. Fuel is targeted to be produced from crop stubble, which otherwise is burnt every year causing pollution and erosion in soil's nutrient value.

It can also be produced from damaged crops, he said, adding efforts are on to also generate fuel from

urban waste as well as bovine excreta. He said Bio-CNG generated from cow dung can be used as a fuel in transport vehicles to cut petrol and diesel consumption.

"Biofuels have synergies with various government initiatives, including enhancing farmers' incomes, and Swachh Bharat," he said. Listing measures of the government on using environment-friendly fuel, he said recycled plastic is being used in road construction while electricity generated from solar panels is being extensively promoted. Besides, LED bulbs are replacing conventional lighting in railways and ports, he said.

Skill India launches 'Fark Dikh Raha Hai'

KOLKATA, AUG 10 /- Skill India aims to increase awareness regarding various initiatives under Skill India, including Pradhan Mantri Kaushal Saksham (PMKVY), National Apprenticeship Promotion Scheme (NAPS) and Industrial Training Institutes (ITIs). Since the launch of Skill India mission on 15th July 2015, more than 1 crore people have benefited annually under the mission and have been able to transform their lives for a better livelihood. Rajesh Agarwal, Joint Secretary and CEO, MSDE said, "Under the able leadership of Ministry of Skill Development and Entrepreneurship, 'Skill India' has been making steady progress towards transforming India as the 'human resource hub' of the world. Over the last three years, various skill development initiatives and policy driven accelerators have helped Indian youth to enhance their skills and stay job-relevant keeping in mind the advent of technology and new age skills that the market place needs today."

Manish Kumar, MD & CEO, NSDC said, "NSDC has collaborated with various stakeholders to ensure that India's youth are empowered with right skills which could help them earn a better livelihood. The 'Fark Dikh Raha Hai' campaign aims to reinforce the benefits of skill training and it's socio-economic across different segments of our society" (EOIC)

With this insight, we have launched our first dual rear camera smartphone - A62, with full screen and multiple value added features." (EOIC)

SITA 2018 Baggage Report published

KOLKATA, AUG 10 /- Airlines around the world have once again improved the rate of baggage delivery, according to the SITA 2018 Baggage Report published recently. This continues the improvement trend of more than a decade which has seen baggage mishandling drop by 70% since 2007.

Barbara Dalbardi, CEO SITA, said: "Over the last decade, we have seen significant improvements in bag management as airlines have taken advantage of technology. Now with IATA's drive for 100% bag tracking, technology adoption will rise further. End-to-end tracking produces data which reveals where improvements can be made in operational processes. While we won't see a sudden change in 2018, it is a real turning point for the industry as airlines begin to unlock the value of the tracking data for the 4.65 billion bags they carry" (EOIC)

Digit Insurance raises USD 44 m in 11th funding round

KOLKATA, AUG 10 /- Digit Insurance has raised USD 44 million in a second round of funding. Canadian billionaire Prem Watsua's Fairfax Holdings has invested second round of capital (USD 45 million) in Digit Infoworks, a parent company for Digit Insurance of which a significant part of the investment (USD 44 million) is given to Digit Insurance. The funding is the largest round in the Indian general insurance ecosystem. This investment brings Digit's total funding to USD 94 million.

Kamesh Goyal, Founder & Chairman, Digit Insurance said, "Our investors have shown confidence in our mission of Making Insurance Simple which is heartening. And this round of funding will further help us in doing that."

Our long-term investment is directed towards bringing in technology into the insurance automate & fasten processes and resolve customer pain points. For example, 100% of our flight delay claims are automated & claims are processed in minutes; 87% of our claim approvals happen in just 24 hours due to innovations like smartphone-enabled self-inspections. We also believe that claims are the sole reason why a customer buys our policies, so for us claims are good," he further added. (EOIC)

Nokia smartphone variants announced in India

KOLKATA, AUG 10 /- HMD Global, the home of Nokia phones, has continued to rapidly renew its portfolio of Nokia Android smartphones by today announcing Nokia 5.1, Nokia 3.1 and Nokia 2.1 in India. Nokia 5.1, Nokia 3.1 and Nokia 2.1 will be available 12th August onwards across top mobile retailers and online on Paytm Mall and Nokia.com/phones

Ajeet Mehta, Vice President and Country Head, India, HMD Global, says: "We are encouraged by the response that we are getting to our products. Our

consumers tell us they love their Nokia smartphones on Android.

It is our constant endeavour to enhance the experience to better suit the everyday needs of our fans. Every single detail on a Nokia smartphone has been designed with consumers in mind, which is why we are delighted to introduce these refined smartphones that deliver a dramatic step up on performance, continue to drive the most premium design elements to price points accessible to everyone and deliver the class-leading quality that you expect from us. Century Ply units become solar powered

KOLKATA, AUG 10 /- In a bid to resonate its commitment towards innovation and social responsibility, Century Ply announced the installation of solar panels at the company's manufacturing unit in Chennai. This initiative at Century Ply's end will reduce its overall energy consumption at each plant and will help in reducing up to 5900 tonnes of carbon footprint per year. Keshav Bhajanka, of Century Ply said, Century Ply is very keen to reduce its carbon footprint and by the means of using solar energy it can be done to a large extent. It is not only a clean and green energy, but also economical in long run. We are currently producing 1 MW electricity through solar energy at Chennai plant and by this FY we will install more capacity and start producing upto 6 MW electricity" (EOIC)

37 PSUs yet to comply with Sebi's public float norm: Govt

NEW DELHI, AUGUST 10 /- As many as 37 listed PSUs have not complied with markets regulator Sebi's 25 per cent minimum public shareholding norms, Parliament was informed on Friday.

As per the norms, PSUs were mandated to achieve the minimum 25 per cent public shareholding by August 21, 2017, which was later extended by a year. Out of the total 89 listed PSUs, 52 are compliant with the minimum public shareholding requirement of 25 per cent and remaining 37 are yet to comply with the rule. Minister of State for Finance P N Radhakrishnan said in a written reply to the Lok Sabha. In a separate reply, Minister of State for Corporate Affairs P P Chaudhary said that 907 cases have been admitted under corporate insolvency resolution process. In 32 cases, resolution plan has been approved and in 129 cases liquidation proceedings have commenced, he added. The provision of the Insolvency and Bankruptcy code provides for adequate safeguards against fraudulent or malicious initiation of proceedings. (PTI)

June factory output expands 7%

NEW DELHI, AUGUST 10 /- Industrial output recorded a growth of 7 per cent in June on account of higher output in mining, manufacturing and power generation segments. Factory output growth means in terms of the Index of Industrial Production (IIP) was revised upwards for May at 3.3 per cent from previous estimate of 3.2 per cent estimated earlier, according to data released by the Central Statistics Office (CSO) on Friday. The cumulative growth for the period April-June 2018 stands at 5.2 per cent over the corresponding period of the previous year.
